

Home Slot

When Volumes are slotted by the Command Line Program [TMSS10SlotAllocation](#) the Slots assigned are determined by the Repository Options setting, either [IntelliSlot](#) or First Available.

Assigning a Volume with a Home Slot will have [TMSS10SlotAllocation](#) attempt to slot that Volume to its Home Slot first, if that Slot is unavailable the Volume will be Slotted according to the preset protocol.

Assigning A Home Slot

To assign a Volume to a Home Slot, from the Inventory window in TapeMaster:

- Right-click a Volume and select [Properties](#)
- Open the [Options](#) tab
- Expand the [Home Locations](#)
- In the [Slot](#) field, enter the required Home Slot number
- Click [Save](#) to update the data and close the Properties window.

If a Volume is Slotted in multiple Repositories (eg Offsite Vault and Racking), [TMSS10SlotAllocation](#) will attempt to assign it to its Home Slot in all Repositories.
