

Troubleshooter: Slotting

The purpose of this troubleshooter is to diagnose why volumes in TapeTrack are not being slotted.

The symptom of slotting not working is that when volumes are moved to a repository that has slotting enabled, the volume does not automatically get a slot assigned.

To use the troubleshooter click on the appropriate **Yes**  or **No**  button.

<hidden>Since you want to know more, here is an explanation with more details</hidden>

Was slotting previously working?
