Troubleshooter: Slotting

The purpose of this troubleshooter is to diagnose why volumes in TapeTrack are not being slotted.

The symptom of slotting not working is that when volumes are moved to a repository that has slotting enabled, the volume does not automatically get a slot assigned.

To use the troubleshooter click on the appropriate \mathbf{Yes}^{\bullet} or \mathbf{No}^{\bullet} button.

<hidden

Yes slotting was previously working>

</hidden>

<hidden No slotting was not previously setup>

</hidden>

Was slotting previously working?
