Troubleshooter: Slotting (New Setup)

Slotting is not enabled by default.

These are the steps required to enable slotting:

- 1. Create or identify an existing User-ID for the slotting task to run under.
- 2. Edit the Slotting.bat script located in the Scripts directory of the Framework Server Folder.
- 3. Update the user string to reflect the User-ID that is to be used for the task.
- 4. Schedule the script to run automatically via Windows Scheduler every 1 to 2 minutes.
- 5. Enable the "Enable Slotting" option for the repository that requires slotting.
- 6. Select the "Slotting Mode" for the repository.
- 7. Map Zones to the repository.
