

# TMSSPDFCOLORHDR

The [Environmental Variable](#) TMSSPDFCOLORHDR changes the color of the PDF report header background or title bar using HEX number input (without the #).

The [Environmental Variable](#) TMSSPDFCOLORHDR will set the color for all report headers.

If used in conjunction with the Report-ID, eg TMSSPDFCOLORHDR100, it will override the global color set for that report. For example TMSS10MoveList produces three reports (Report 117, 118 and 119), setting TMSSPDFCOLORHDR to red and TMSSPDFCOLORHDR117 to blue would produce a PDF report 117 with a blue title bar, 118 and 119 with a red title bar.

## Example

To change the title bar to Red

## Windows Command Line

```
set TMSSPDFCOLORHDR=FF0000
set TMSSPDFCOLORHDR100=0066CC
```

## Windows PowerShell

```
$env:TMSSPDFCOLORHDR = "FF0000"
```

## Linux

```
export TMSSPDFCOLORHDR="FF0000"
```
